

New life - Suggestion from Ljubljana

JUMP TO FORUM DISCUSSION ABOUT THE SUGGESTED THEME

New life is a religion, which mostly contains a lot of young people that used to take drugs. In our information New life came from Ireland. Reason, why those kids found something in religion called New life is for now unknown and we first have to do some interviews to find out. All we know is that New live spread in Slovenia very fast and it still spreading, mostly in region Pomurje. Majority of young people, after they return from rehabilitation center are looking some kind of shelter and reason to stay clean. All those persons I talked to said that they now what helps them and they will always believe in that, even if they don't want to mention the god. My own aspect and aspect of other people is different, because it actually depends from person to person who know what is actually happening. Most of those people changed after they joined New life, not physically but mentally, because in that time, when they returned, they were still very confused and vulnerable, so they can not decide what is good for them. My own opinion is that, even if they don't realize that, those people who spread this religion use that confusion against them. Most of them are now in Ireland, learning to become preachers. About what and why they will preach we have to interview others.
